Swish is proud to represent the finest manufacturers in the sanitation industry.

Minuteman®

Minuteman® is a full line manufacturer of maintenance products including filter vacuums, industrial and commercial vacuums, sweepers, scrubbers, floor and carpet machines. **PowerBoss®** is a complete line of quality industrial sweepers and scrubbers. **Parker®** offers a unique line of specialty grounds maintenance equipment.

NACECARE™
SOLUTIONS
Clarity in Cleaning

NACECARE™ Solutions provides one of the industry's most innovative and diverse product lines. With well over 100 models, including the world's quietest vacuum and a totally portable automatic scrubber, NACECARE™ is clearly committed to maintaining its status as an innovative leader in the cleaning equipment industry.

KÄRCHER®

Kärcher® is the world's largest manufacturer of pressure washers. Kärcher's research and development centre has more than 180 engineers and technicians working on new problem solutions and is both ISO9001 and ISO4001 certified.

Sanitaire®

Sanitaire® commercial vacuums have been serving the commercial market for 30 years. Known for durability and long life, Sanitaire vacuums are very cost efficient. Sanitaire is proud of the fact that some commercial cleaners have been using the same vacuum for 20 years.

Equipment Maintenance & Service

We offer Planned Maintenance Programs for most Commercial/Industrial machines in the market. Our program provides regular preventive maintenance to your cleaning equipment, which assures you that regular scheduled maintenance is done and identifies possible problems before they occur.

At Swish, we have a serious commitment to Service.

The end result is dependability, reduced down time, enhanced facility appearance and lower overall cost. Our factory-trained technicians are industry experts when it comes to repair and preventive maintenance. Our factory authorized repair centres stock a complete range of parts for major equipment brands such as Minuteman®, NACECARE™, Nilfisk Advance, Kärcher®, PowerBoss®, Parker® and NSS.

We also service all other manufacturers equipment.

Increase Your Productivity - Gain Labour Savings

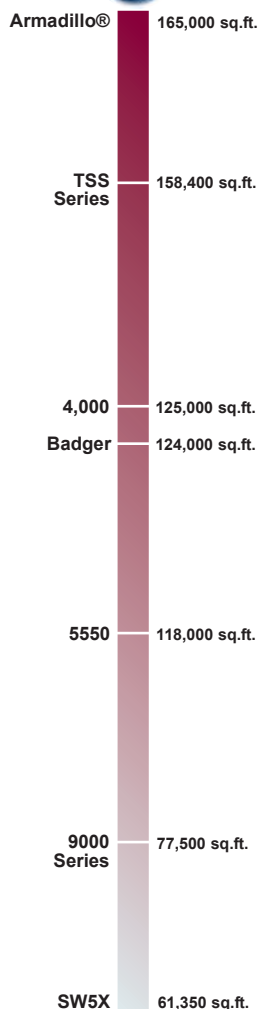

The obvious choice to Increase your Productivity and Gain Labour Savings is a Ride On Scrubber versus a Walk Behind. A comparison of the Minuteman SCV™28/32 Ride On Scrubber that cleans up to 44,000 sq. ft. per hour and the Minuteman ES28/32 Walk Behind at 33,500 sq. ft. per hour indicates a performance difference of 10,500 sq. ft. per hour. Although the machines have the same scrubbing path width, the Rider Scrubber is over 25% faster with superior productivity. Other added benefits of Ride On Scrubbers versus Walk Behind include less operator fatigue and more ergonomic design for the comfort of the operator.

Rider Scrubbers Are Ideal For Use In:

- Manufacturing Plants
 - Supermarkets
 - Department Stores
 - Schools, Universities
 - Garages
 - Office Buildings
 - Warehouses
- and many more indoor/outdoor uses.
