

Product Information Sheet

Swish Clean & Green™ High Traction Neutral Gloss Restorer

Description: This specially formulated one step safety enhancing cleaner/maintainer cleans and helps restore the gloss of virtually any coating on any type of floor surface. It has the ability to instantly improve the slip resistant properties of any surface it is applied to. Swish Clean & Green™ High Traction can be applied with either a mop or auto scrubber and will not cause a build up with routine use.

Uses: Used on all types of flooring including: resilient tile, terrazzo, marble, quarry stone, blue stone, mexican tile, ceramic tile, concrete, and sealed wood

Directions:

1. Thoroughly sweep the floor to remove dirt and soil.
2. Floors with heavy concentrations of oil, grease, or animal protein soils should be cleaned with a degreaser to obtain optimum results.
3. Dilute Swish Clean & Green™ High Traction 2 oz per gallon (60mL/4L) with warm water.
4. Swish Clean & Green™ High Traction may be applied using either a damp mop or auto scrubber. A two bucket system, in which one bucket holds the Swish Clean & Green™ High Traction solution and one into which the soiled solution is wrung, will provide the most satisfactory results. Using a clean cotton or cotton/synthetic combination mop, damp mop the floor. For use in an auto scrubber, place the Swish Clean & Green™ High Traction solution in the feed tank of the automatic scrubber. The solution may be applied, scrubbed and vacuumed in one step. Following damp mopping or scrubbing, allow the floor to dry completely, but do not rinse.
5. To restore gloss or repair scuffs, buff the treated area with an appropriate buffing pad or brush with either low or high speed buffing machine.

Product Code & Size

#65334-4 3.78 L

Green Benefits:

Certified by UL for slip resistance. Readily biodegradable
Ecologo-certified
Packaging contains recycled material
Free of phosphates and EDTA
Free of phthalates and perfluorooctanoic acid (PFOA) derivatives.
Does not comprise of material originating from nonylphenol (NP)
Low in VOCs
Non-toxic towards aquatic life
